Subject Index

Abductor digiti minimi, A rare anomaly of abductor digiti minimi (Sañudo, *et al.*) **182,** 439

Accessory extensor digiti minimi, An accessory extensor digiti minimi arising from the extensor carpi ulnaris (Nakashima) **182,** 109

Accessory muscle, A rare anomaly of abductor digiti minimi (Sañudo, *et al.*) **182,** 439

Adrenal gland, Novel peptides from adrenomedullary chromaffin vesicles (Sigafoos, *et al.*) **182,** 121, *P*

The adrenal chromaffin granule: a model for large dense core vesicles (Winkler) **182,** 121, *P*

Noncholinergic control of adrenal catecholamine secretion (Livett & Marley) **182,** 122, *P*

The innervation of the adrenal medulla (Parker, *et al.*) **182,** 122, *P*

Autonomic control of adrenal function in the conscious calf (Edwards & Jones) **182,** 122, *P*

Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **182,** 123, *P*

Kinetics of adrenal medullary cells (Verhofstad) **182,** 123, *P*

Chromium binding studies on rat adrenal medullary noradrenaline-containing granules following glutaraldehyde fixation (Santer & Hann) **182,** 124, *P*

Innervation of the marmoset adrenal gland: a retrograde fluorescent tracer study (Kesse & Parker) **182,** 139, *dem*

Substance P and vasoactive intestinal polypeptide in the adrenal gland of the fetal pig: an immunohistochemical approach (Weyns, *et al.*) **182,** 141, *dem*

Adrenal medulla, An immunohistochemical study for neuropeptide Y and vasoactive intestinal polypeptide in ovine, bovine and equine adrenal medulla (Lammens, *et al.*) **182,** 141, *dem*

Adrenaline, Morphological aspects of chromaffin tissue: the differential fixation of adrenaline and noradrenaline (Kobayashi & Coupland) **182,** 121, *P*

Ageing, Age-related changes in fibrocartilages associated with the Achilles tendon of the rat (Rufai, *et al.*) **182,** 134, *dem*

Albumin, A comparative study of the uptake of fluorescently labelled immunoglobulin G (IgG) and bovine serum albumin in cultured rat visceral yolk sacs (Jefferson & Pratten) **182,** 147, *dem*

Aldose reductase inhibition, Effects of insulin and aldose reductase inhibition on enterocyte microvilli in streptozotocin-diabetic small intestine (Williams & Mayhew) **182,** 132, *P*

Alkaline phosphatase, Cell and matrix changes associated with pathological calcification of the human rotator cuff tendons (Archer, *et al.*) **182,** 1

Apical–basal membrane polarity of membrane phosphatases in isolated capillary endothelium: alteration in ultrastructural localisation under culture conditions (Roberts & Sandra) **182,** 339

Amoeboid microglia, Variation with age in the labelling of amoeboid microglial cells in rats following intraperitoneal or intravenous injection of a fluorescent dye (Xu, *et al.*) **182,** 55

Anatomical variation, An accessory extensor digiti minimi arising from the extensor carpi ulnaris (Nakashima) **182,** 109

Angiotensin II, Autoradiographic analysis of the uptake of [^{3}H]dopamine, [^{3}H]angiotensin II and [^{3}H]gamma aminobutyric acid by the chicken thrombocyte (Daimon, *et al.*) **182,** 169

Angora goat, Growth and viability of secondary hair follicles of the Angora goat cultured in vitro (Ibraheem, *et al.*) **182,** 231

Aorta, Morphological variations of the human ascending aortic fold (Lebona) **182,** 275

Arid environment, A qualitative analysis of the kidney structure of Meliphagid honeyeaters from wet and arid environments (Casotti & Richardson) **182,** 239

Arteries, The arterial pattern of the holoprosencephalic brain (Overbbeke, *et al.*) **182,** 144, *dem*

Arteriolar blockade, Bone blood flow in the rat using arteriolar blockade: comparisons between labelled resin particles and microspheres (Revell & Brookes) **182,** 305

Articular cartilage, Novel articular cartilage structure in the South American opossum, *Monodelphis domestica* (Morrison, *et al.*) **182,** 321

Ascending aortic fold, Morphological variations of the human ascending aortic fold (Lebona) **182,** 275

Atrioventricular valves, Microappendages on the atrioventricular valves of the guinea pig (Hill & Folan-Curran) **182,** 425

Autonomic system, Autonomic control of adrenal function in the conscious calf (Edwards & Jones) **182,** 122, *P*

Avoidance learning, Time-course of synaptogenesis following passive avoidance learning in the chick (Hunter) **182,** 142, *dem*

Basilar artery, Do haemodynamic forces bend the basilar artery? (Ravensbergen, *et al.*) **182,** 144, *dem*

Biceps brachii, High incidence of the third head of biceps brachii in South African populations (Asvat, *et al.*) **182,** 101

Loss of the fibrocartilaginous lining of the intertubercular sulcus associated with rupture of the tendon of the long head of biceps brachii (Benjamin, *et al.*) **182,** 281

Fibrocartilage lining the intertubercular sulcus of the humerus regresses when the tendon of the long head of biceps brachii is ruptured (Benjamin, *et al.*) **182,** 135, *dem*

Bile ducts, Microcirculation of the extrahepatic biliary tree: a scanning electron microscopy study of corrosion casts (Gaudio, *et al.*) **182,** 37

Biomechanics, Lines of action and moment arms of the major force-carrying structures crossing the human knee joint (Herzog & Read) **182,** 213

Bleomycin, Anatomy of Clara cell secretion: surface changes observed by scanning electron microscopy (Peão, *et al.*) **182,** 377

Blood–brain barrier, Variation with age in the labelling of amoeboid microglial cells in rats following intraperitoneal or intravenous injection of a fluorescent dye (Xu, *et al.*) **182,** 55

Blood flow, Bone blood flow in the rat using arteriolar blockade: comparisons between labelled resin particles and microspheres (Revell & Brookes) **182,** 305

Blood vessels, Regional study of microangiography in human diabetic neuropathy, suggesting two possible mechanisms of pathogenesis (Thompson, *et al.*) **182,** 128, *P*

Microcirculation of the extrahepatic biliary tree: a scanning electron microscopy study of corrosion casts (Gaudio, *et al.*) **182,** 37

Morphological observations on pancreatic islet blood vessels in low-dose streptozocin-treated mice (Papaccio, *et al.*) **182,** 45

Bone, A survey of chondroid bone in Osteichthyes (Benjamin & Huysseune) **182,** 134, *dem*

Developments in techniques for the study of cancellous bone architecture from radiographic images (O'Higgins & Ellison) **182,** 135, *dem*

A comparison of the osteoinductive properties of six different bone graft substitutes using a heterotopic implantation site (Begley & Wilson) **182,** 136, *dem*

Bone blood flow in the rat using arteriolar blockade: comparisons between labelled resin particles and microspheres (Revell & Brookes) **182,** 305

Bone graft substitutes, A comparison of the osteoinductive properties of six different bone graft substitutes using a heterotopic implantation site (Begley & Wilson) **182,** 136, *dem*

Bone modelling, Early periosteal changes in translation-induced bone modelling (Feik) **182,** 389

Cavernous sinus, Extensive nervous connections in and around the cavernous sinus (Bleys & Groen) **182,** 144, *dem*
Cavernous sinus plexus, Distribution of otic postganglionic and recurrent mandibular nerve fibres to the cavernous sinus plexus in monkeys (Ruskell) **182,** 187
Cell culture, Clonal cell cultures from human fetal olfactory neurons (Balboni, *et al.*) **182,** 131, *P*
Cell kinetics, Kinetics of adrenal medullary cells (Verhofstad) **182,** 123, *P*
Cell loss, Cell loss during early postnatal development of the rat inferior olivary nucleus (Piyawinijiwong, *et al.*) **182,** 139, *dem*
Cell migration, The effects of extremely low frequency electromagnetic fields on migrating mammalian and avian neural crest cells (Parker, *et al.*) **182,** 140, *dem*
Cell proliferation, The proliferative status of cells derived from murine fetal liver which form colonies in vitro (high proliferative potential colony-forming cells – HPP.CFC) (Blair, *et al.*) **182,** 129, *P*
Cercocebus atys, Patterns of craniofacial growth in the sooty mangabey, *Cercocebus atys* (O'Higgins) **182,** 127, *P*
Cerebellum, New structural aspects of the synaptic contacts on Purkinje cells in an elasmobranch cerebellum (Alvarez-Otero, *et al.*) **182,** 13
Cerebral arteries, A quantitative study of the variability of the vascular territories of the major cerebral arteries of the human brain (van der Zwan, *et al.*) **182,** 143, *dem*
Cerebral cortex, Differences in architecture and transmitter receptor distribution between motor and sensory areas of the human neocortex (Zilles) **182,** 129, *P*
A quantitative study of the differentiation of microglial cells in the developing cerebral cortex in rats (Wu, *et al.*) **182,** 403
Chick, Time-course of synaptogenesis following passive avoidance learning in the chick (Hunter) **182,** 142, *dem*
Chick primordial germ cells normally populate the stages 6–8 headfold region (England) **182,** 149, *dem*
Chicken, Brush cells in the epithelium of chicken lower intestine (coprodaeum) (Elbrønd & Dantzer) **182,** 132, *P*
Autoradiographic analysis of the uptake of [^{3}H]dopamine, [^{3}H]angiotensin II and [^{3}H]gamma aminobutyric acid by the chicken thrombocyte (Daimon, *et al.*) **182,** 169
Chondrocytes, Cell and matrix changes associated with pathological calcification of the human rotator cuff tendons (Archer, *et al.*) **182,** 1
Immunohistochemical demonstration of epidermal growth factor in chondrocytes of mouse femur epiphyseal plate (Tajima, *et al.*) **182,** 291
Chondroid bone, A survey of chondroid bone in Osteichthyes (Benjamin & Huysseune) **182,** 134, *dem*
Chromaffin cell, The chromaffin cell: paradigm in cell, developmental and growth factor biology (Unsicker) **182,** 123, *P*
Chromaffin cells, Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **182,** 123, *P*
Chromaffin granule, The adrenal chromaffin granule: a model for large dense core vesicles (Winkler) **182,** 121, *P*
Chromaffin tissue, Morphological aspects of chromaffin tissue: the differential fixation of adrenaline and noradrenaline (Kobayashi & Coupland) **182,** 121, *P*
Comparative morphology, cytochemistry and innervation of the chromaffin tissue in vertebrates (Scheuermann) **182,** 123, *P*
Chromaffin vesicles, Novel peptides from adrenomedullary chromaffin vesicles (Sigafoos, *et al.*) **182,** 121, *P*
Circulation, The inter-relationship between the fetal human and maternal placental circulations – a new stereological approach (Karimu & Burton) **182,** 131, *P*
A quantitative study of the variability of the vascular territories of the major cerebral arteries of the human brain (van der Zwan, *et al.*) **182,** 143, *dem*
Do haemodynamic forces bend the basilar artery? (Ravensbergen, *et al.*) **182,** 144, *dem*
The arterial pattern of the holoprosencephalic brain (Overbbeke, *et al.*) **182,** 144, *dem*
A study on the vascular organisation and histology of the submandibular gland of the dog (Lung) **182,** 146, *dem*
A study of the vascular arrangements and histology of the canine oral mucosa of the hard palate (Wang & Lung) **182,** 146, *dem*
Cisterna chyli, Ultrastructure of the monkey thoracic duct and the cisterna chyli (Lee, *et al.*) **182,** 205
Clara cells, Anatomy of Clara cell secretion: surface changes observed by scanning electron microscopy (Peão, *et al.*) **182,** 377
Climbing fibres, New structural aspects of the synaptic contacts on Purkinje cells in an elasmobranch cerebellum (Alvarez-Otero, *et al.*) **182,** 13
Collagen, A morphological examination of the smooth muscle and collagen network of varicose veins (Dovell, *et al.*) **182,** 145, *dem*
Morphological evaluation of collagen in varicose and

nonvaricose veins using computerised image analysis (Travers, *et al.*) **182,** 145, *dem*

Colon, A morphometric study of mucigen granules in control and irradiated mouse colon (Nunn, *et al.*) **182,** 137, *dem*

Colorectal crypts, An ultrastructural morphometric study of epithelial nuclei at defined levels of normal colorectal crypts (Tipoe, *et al.*) **182,** 137, *dem*

Computing, First steps in producing computer packages for medical students (Thomas, *et al.*) **182,** 138, *dem*

Coprodaeum, Brush cells in the epithelium of chicken lower intestine (coprodaeum) (Elbrønd & Dantzer) **182,** 132, *P*

Coronal suture, The coronal suture system (Hoyte) **182,** 128, *P*

Corrosion casts, Microcirculation of the extrahepatic biliary tree: a scanning electron microscopy study of corrosion casts (Gaudio, *et al.*) **182,** 37

Coumarin, A quantitative assessment of lobar liver pathology in the rat following treatment with coumarin (Fernyhough, *et al.*) **182,** 138, *dem*

Cow, An immunohistochemical study for neuropeptide Y and vasoactive intestinal polypeptide in ovine, bovine and equine adrenal medulla (Lammens, *et al.*) **182,** 141, *dem*

Craniofacial development, Retinoic acid involvement in craniofacial and limb malformations. Histochemical and scanning electron microscopical observations (Emmanouil-Nikoloussi, *et al.*) **182,** 130, *P*

Craniofacial growth, Patterns of craniofacial growth in the sooty mangabey, *Cercocebus atys* (O'Higgins) **182,** 127, *P*

Cumulus complexes, A study of human cumulus complexes using light microscopy and scanning electron microscopy (Kennedy, *et al.*) **182,** 148, *dem*

An analysis of the interaction between human spermatozoa and oocyte-cumulus complexes in in vitro studies (Lister, *et al.*) **182,** 149, *dem*

Cytoarchitectonics, Differences in architecture and transmitter receptor distribution between motor and sensory areas of the human neocortex (Zilles) **182,** 129, *P*

Cytochemistry, Comparative morphology, cytochemistry and innervation of the chromaffin tissue in vertebrates (Scheuermann) **182,** 123, *P*

Cytochrome P450 gene, The ontogeny of cytochrome P450 IV gene expression in the rat (Simpson, *et al.*) **182,** 148, *dem*

Decidua, The ultrastructure of giant interstitial trophoblast cells in the decidua of the pregnant short-tailed field vole (*Microtus agrestis*) (Stewart & Clarke) **182,** 150, *dem*

Dermis, Responses of dermal mast cells to injury (El Sayed So & Dyson) **182,** 369

Development, Cellular activity in the developing palate of the rat assessed by the staining of nucleolar organising regions (Singh & Moxham) **182,** 163

Diabetes, Morphological observations on pancreatic islet blood vessels in low-dose streptozocin-treated mice (Papaccio, *et al.*) **182,** 45

Diabetes mellitus, Transplantation of pancreatic islets into the tongue of diabetic rats (El-Naggar, *et al.*) **182,** 124, *P*

Unmyelinated fibre morphology in patients with mild diabetic neuropathy (Townsend, *et al.*) **182,** 128, *P*

Regional study of microangiography in human diabetic neuropathy, suggesting two possible mechanisms of pathogenesis (Thompson, *et al.*) **182,** 128, *P*

Effects of insulin and aldose reductase inhibition on enterocyte microvilli in streptozotocin-diabetic small intestine (Williams & Mayhew) **182,** 132, *P*

Do neurophysiological and pathological abnormalities of unmyelinated fibres discriminate painful from painless diabetic neuropathy (Townsend, *et al.*) **182,** 142, *dem*

DNA synthesis, Growth and viability of secondary hair follicles of the Angora goat cultured in vitro (Ibraheem, *et al.*) **182,** 231

Dog, A study of the vascular arrangements and histology of the canine oral mucosa of the hard palate (Wang & Lung) **182,** 146, *dem*

A study on the vascular organisation and histology of the submandibular gland of the dog (Lung) **182,** 146, *dem*

Morphological and histochemical characteristics of muscle fibre types in the flexor carpi radialis of the dog (Latorre, *et al.*) **182,** 313

Skeletal muscle fibre types in the dog (Latorre, *et al.*) **182,** 329

Dopamine, Autoradiographic analysis of the uptake of [^{3}H]dopamine, [^{3}H]angiotensin II and [^{3}H]gamma aminobutyric acid by the chicken thrombocyte (Daimon, *et al.*) **182,** 169

Ear, Age-related morphological changes in the human incus: a scanning electron microscopic study (Lannigan, *et al.*) **182,** 127, *P*

Elasmobranchs, New structural aspects of the synaptic contacts on Purkinje cells in an elasmobranch cerebellum (Alvarez-Otero, *et al.*) **182,** 13

Elastic lamina, Bruch's membrane with an elastic lamina in the eye of a teleost (Nag) **182,** 113

Electromagnetic fields, The effects of extremely low frequency electromagnetic fields on migrating mammalian and avian neural crest cells (Parker, *et al.*) **182,** 140, *dem*

Embalming fluids, An improved composition for embalming fluid to preserve cadavers for anatomy teaching in the United Kingdom (O'Sullivan & Mitchell) **182,** 295

Embryogenesis, The effects of insulin and insulin-like growth factor II on embryogenesis and ectoplacental growth (Travers, *et al.*) **182,** 146, *dem*

Enamel structure, Morphology of the most common form of protostylid on human lower molars (Gašperšič) **182,** 429

Endometrium, Polarised growth of human endometrial epithelial cells in vitro (Hill, *et al.*) **182,** 149, *dem*

Enterocytes, Effects of insulin and aldose reductase inhibition on enterocyte microvilli in streptozotocin-diabetic small intestine (Williams & Mayhew) **182,** 132, *P*

Epidermal equivalent, Development of a human epidermal equivalent in vitro (Ward, *et al.*) **182,** 151, *dem*

Epidermal growth factor, Immunohistochemical demonstration of epidermal growth factor in chondrocytes of mouse femur epiphyseal plate (Tajima, *et al.*) **182,** 291

Epididymis, Diet-induced histological changes in the epididymis of rats (Umapathy & Msamati) **182,** 130, *P*

Epiphyseal plate, Immunohistochemical demonstration of epidermal growth factor in chondrocytes of mouse femur epiphyseal plate (Tajima, *et al.*) **182,** 291

Epithelium, A scanning electron microscopic study of normal and malignant exfoliated oral squames (Murray, *et al.*) **182,** 136, *dem*

Variation in epithelium and muscle in the jejunum of two strains of mice (Brennan, *et al.*) **182,** 137, *dem*

The uptake of microparticles across the intestinal epithelium in the rabbit and rat (Howard, *et al.*) **182,** 138, *dem*

Erector spinae, Anatomy and development of an 'iliolumbar' part of the erector spinae muscle (Evans, *et al.*) **182,** 135, *dem*

Exercise, Quantitative and spatial aspects of degenerative changes in rat soleus muscle after exercise of different durations (Van der Meulen, *et al.*) **182,** 349

Exocytosis, Exocytosis in adrenal chromaffin cells (Burgoyne, *et al.*) **182,** 123, *P*

Extensor carpi ulnaris, An accessory extensor digiti minimi arising from the extensor carpi ulnaris (Nakashima) **182,** 109

Extrahepatic biliary tree, Microcirculation of the extrahepatic biliary tree: a scanning electron microscopy study of corrosion casts (Gaudio, *et al.*) **182,** 37

Eye, Bruch's membrane with an elastic lamina in the eye of a teleost (Nag) **182,** 113

Ubiquitin-protein conjugates, αB crystallin and ubiquitin C-terminal hydrolase (PGP9.5) in the developing lens (Royal, *et al.*) **182,** 147, *dem*

Fetus, The proliferative status of cells derived from murine fetal liver which form colonies in vitro (high proliferative potential colony-forming cells – HPP.CFC) (Blair, *et al.*) **182,** 129, *P*

Clonal cell cultures from human fetal olfactory neurons (Balboni, *et al.*) **182,** 131, *P*

The inter-relationship between the fetal human and maternal placental circulations – a new stereological approach (Karimu & Burton) **182,** 131, *P*

Substance P and vasoactive intestinal polypeptide in the

adrenal gland of the fetal pig: an immunohistochemical approach (Weyns, *et al.*) **182,** 141, *dem*

Fibrocartilage, Fibrocartilage in the volar plate and extensor tendon of the proximal interphalangeal joint of human fingers (Ralphs, *et al.*) **182,** 134, *dem*

Age-related changes in fibrocartilages associated with the Achilles tendon of the rat (Rufai, *et al.*) **182,** 134, *dem*

Fibrocartilage lining the intertubercular sulcus of the humerus regresses when the tendon of the long head of biceps brachii is ruptured (Benjamin, *et al.*) **182,** 135, *dem*

Loss of the fibrocartilaginous lining of the intertubercular sulcus associated with rupture of the tendon of the long head of biceps brachii (Benjamin, *et al.*) **182,** 281

Field vole, Uterine morphology and the distribution of granulated metrial gland cells in the virgin and pregnant short-tailed field vole, *Microtus agrestis* (Stewart & Clarke) **182,** 75

Fingers, Fibrocartilage in the volar plate and extensor tendon of the proximal interphalangeal joint of human fingers (Ralphs, *et al.*) **182,** 134, *dem*

Fish, Bruch's membrane with an elastic lamina in the eye of a teleost (Nag) **182,** 113

New structural aspects of the synaptic contacts on Purkinje cells in an elasmobranch cerebellum (Alvarez-Otero, *et al.*) **182,** 13

A survey of chondroid bone in Osteichthyes (Benjamin & Huysseune) **182,** 134, *dem*

Fluorogold, Innervation of the rat tympanic membrane from the superior cervical and glossopharyngeal ganglia (Tierney, *et al.*) **182,** 355

GABA, GABA as a regulator of neurite growth in mouse spinal cord structures (Owen & Bird) **182,** 140, *dem*

Galactose neuropathy, Experimental galactose neuropathy: quantitative changes in intramembranous particles in fracture faces of the perineurium (Beamish, *et al.*) **182,** 105

Genetic variation, The inheritance of patterns of variation in the mouse vertebral column (Johnson & O'Higgins) **182,** 126, *P*

Glomerulotubal junction, The mammalian glomerotubular junction studied by scanning and transmission electron microscopy (Lee, *et al.*) **182,** 177

Glossopharyngeal ganglion, Innervation of the rat tympanic membrane from the superior cervical and glossopharyngeal ganglia (Tierney, *et al.*) **182,** 355

Gluteus medius, Innervation of the anteromedial muscle bundles of the gluteus medius (Akita, *et al.*) **182,** 433

Gonadal differentiation, Gonadal sex differentiation in embryos and neonates of the marsupial, *Monodelphis domestica*: arrest of testis development in postterm embryos (Baker, *et al.*) **182,** 267

Granulated metrial cells, Scanning electron microscopy of the cellular associations formed between mouse granulated metrial gland cells and labyrinthine placental trophoblast in culture (Stewart & Mukhtar) **182,** 150, *dem*

Granulated metrial gland cell, Uterine morphology and the distribution of granulated metrial gland cells in the virgin and pregnant short-tailed field vole, *Microtus agrestis* (Stewart & Clarke) **182,** 75

Granulated metrial gland cells, Observations of the surface morphology of cultured granulated metrial gland cells (Mukhtar & Stewart) **182,** 415

Granules, Responses of dermal mast cells to injury (El Sayed So & Dyson) **182,** 369

Growth, The effect of nutrition on the size and proportion of muscle fibres during growth (Yamaguchi, *et al.*) **182,** 29

Guinea pig, Microappendages on the atrioventricular valves of the guinea pig (Hill & Folan-Curran) **182,** 425

Haemodynamic forces, Do haemodynamic forces bend the basilar artery? (Ravensbergen, *et al.*) **182,** 144, *dem*

Hair growth, Growth and viability of secondary hair follicles of the Angora goat cultured in vitro (Ibraheem, *et al.*) **182,** 231

Hair shaft, Growth and viability of secondary hair follicles of the Angora goat cultured in vitro (Ibraheem, *et al.*) **182,** 231

Hand, Vasomotor innervation of the skin of the hand: a contribution to the study of human anatomy (Campero, *et al.*) **182,** 361

Heart valves, Microappendages on the atrioventricular valves of the guinea pig (Hill & Folan-Curran) **182,** 425

Hen, Morphometry of hen lower intestine at different rates of sodium-absorption: plasma membrane signatures of cells and whole organs (Dantzer, *et al.*) **182,** 132, *P*

Histochemistry, Morphological and histochemical characteristics of muscle fibre types in the flexor carpi radialis of the dog (Latorre, *et al.*) **182,** 313

Skeletal muscle fibre types in the dog (Latorre, *et al.*) **182,** 329

Holoprosencephaly, The arterial pattern of the holoprosencephalic brain (Overbbeke, *et al.*) **182,** 144, *dem*

Honeyeater birds, A qualitative analysis of the kidney structure of Meliphagid honeyeaters from wet and arid environments (Casotti & Richardson) **182,** 239

Horse, An immunohistochemical study for neuropeptide Y and vasoactive intestinal polypeptide in ovine, bovine and equine adrenal medulla (Lammens, *et al.*) **182,** 141, *dem*

Humerus, Fibrocartilage lining the intertubercular sulcus of the humerus regresses when the tendon of the long head of biceps brachii is ruptured (Benjamin, *et al.*) **182,** 135, *dem*

Loss of the fibrocartilaginous lining of the intertubercular sulcus associated with rupture of the tendon of the long head of biceps brachii (Benjamin, *et al.*) **182,** 281

Immunoglobulin, A comparative study of the uptake of fluorescently labelled immunoglobulin G (IgG) and bovine serum albumin in cultured rat visceral yolk sacs (Jefferson & Pratten) **182,** 147, *dem*

Immunohistochemistry, Substance P and vasoactive intestinal polypeptide in the adrenal gland of the fetal pig: an immunohistochemical approach (Weyns, *et al.*) **182,** 141, *dem*

An immunohistochemical study for neuropeptide Y and vasoactive intestinal polypeptide in ovine, bovine and equine adrenal medulla (Lammens, *et al.*) **182,** 141, *dem*

Incus, Age-related morphological changes in the human incus: a scanning electron microscopic study (Lannigan, *et al.*) **182,** 127, *P*

Inferior olive, Cell loss during early postnatal development of the rat inferior olivary nucleus (Piyawinijiwong, *et al.*) **182,** 139, *dem*

Infrared telethermography, Vasomotor innervation of the skin of the hand: a contribution to the study of human anatomy (Campero, *et al.*) **182,** 361

Inheritance, The inheritance of vertebral shape in the mouse II. A study using Fourier analysis to examine the inheritance of patterns of vertebral variation in the cervical and upper thoracic vertebral column (O'Higgins & Johnson) **182,** 65

Innervation, The innervation of the adrenal medulla (Parker, *et al.*) **182,** 122, *P*

Comparative morphology, cytochemistry and innervation of the chromaffin tissue in vertebrates (Scheuermann) **182,** 123, *P*

Innervation of the marmoset adrenal gland: a retrograde fluorescent tracer study (Kesse & Parker) **182,** 139, *dem*

Calcitonin gene-related peptide innervation of rat stomach: an ultrastructural study (Ali & Vaillant) **182,** 143, *dem*

A study of the innervation of the spleen of *Xenopus laevis*, the South African clawed toad, during metamorphosis (Clothier, *et al.*) **182,** 143, *dem*

Innervation of the anteromedial muscle bundles of the gluteus medius (Akita, *et al.*) **182,** 433

Insulin, The effects of insulin and insulin-like growth factor II on embryogenesis and ectoplacental growth (Travers, *et al.*) **182,** 146, *dem*

Insulin-like growth factor 1 receptors, Use of confocal and epifluorescence microscopy to analyse the distribution of insulin and insulin-like growth factor 1 receptors on the rat visceral yolk sac (Cowley & Pratten) **182,** 147, *dem*

Insulin-like growth factor II, The effects of insulin and insulin-like growth factor II on embryogenesis and ectoplacental growth (Travers, *et al.*) **182,** 146, *dem*

Insulin receptors, Use of confocal and epifluorescence microscopy to analyse the distribution of insulin and insulin-like

growth factor 1 receptors on the rat visceral yolk sac (Cowley & Pratten) **182,** 147, *dem*
Immunocytochemical localisation of insulin receptors on rat superior cervical ganglion neurons in dissociated cell culture (James, *et al.*) **182,** 95
Interparietal bone, Developmental studies on the interparietal part of the human occipital squama (Matsumura, *et al.*) **182,** 197
Intertubercular sulcus, Fibrocartilage lining the intertubercular sulcus of the humerus regresses when the tendon of the long head of biceps brachii is ruptured (Benjamin, *et al.*) **182,** 135, *dem*
Loss of the fibrocartilaginous lining of the intertubercular sulcus associated with rupture of the tendon of the long head of biceps brachii (Benjamin, *et al.*) **182,** 281
Intestine, Morphometry of hen lower intestine at different rates of sodium-absorption: plasma membrane signatures of cells and whole organs (Dantzer, *et al.*) **182,** 132, *P*
Brush cells in the epithelium of chicken lower intestine (coprodaeum) (Elbrønd & Dantzer) **182,** 132, *P*
Effects of insulin and aldose reductase inhibition on enterocyte microvilli in streptozotocin-diabetic small intestine (Williams & Mayhew) **182,** 132, *P*
An ultrastructural morphometric study of epithelial nuclei at defined levels of normal colorectal crypts (Tipoe, *et al.*) **182,** 137, *dem*
Variation in epithelium and muscle in the jejunum of two strains of mice (Brennan, *et al.*) **182,** 137, *dem*
A morphometric study of mucigen granules in control and irradiated mouse colon (Nunn, *et al.*) **182,** 137, *dem*
The uptake of microparticles across the intestinal epithelium in the rabbit and rat (Howard, *et al.*) **182,** 138, *dem*
Intestitial trophoblast, Uterine morphology and the distribution of granulated metrial gland cells in the virgin and pregnant short-tailed field vole, *Microtus agrestis* (Stewart & Clarke) **182,** 75
Intramembranous particles, Experimental galactose neuropathy: quantitative changes in intramembranous particles in fracture faces of the perineurium (Beamish, *et al.*) **182,** 105
Islets of Langerhans, Transplantation of pancreatic islets into the tongue of diabetic rats (El-Naggar, *et al.*) **182,** 124, *P*
Ultrastructure of transplanted pancreatic islets in the rat (Tahir, *et al.*) **182,** 124, *P*

Jejunum, Variation in epithelium and muscle in the jejunum of two strains of mice (Brennan, *et al.*) **182,** 137, *dem*

Kidney, The mammalian glomerotubular junction studied by scanning and transmission electron microscopy (Lee, *et al.*) **182,** 177
A qualitative analysis of the kidney structure of Meliphagid honeyeaters from wet and arid environments (Casotti & Richardson) **182,** 239
Knee joint, Studies on the development of the rat knee joint (Dowthwaite, *et al.*) **182,** 133, *dem*
Lines of action and moment arms of the major force-carrying structures crossing the human knee joint (Herzog & Read) **182,** 213

Learning, Time-course of synaptogenesis following passive avoidance learning in the chick (Hunter) **182,** 142, *dem*
Lectin histochemistry, A quantitative study of the differentiation of microglial cells in the developing cerebral cortex in rats (Wu, *et al.*) **182,** 403
Lens, Ubiquitin-protein conjugates, αB crystallin and ubiquitin C-terminal hydrolase (PGP9.5) in the developing lens (Royal, *et al.*) **182,** 147, *dem*
Ligament, An anatomical study of the deep transverse metacarpal ligament (Al-Qattan & Robertson) **182,** 443
Limb development, Retinoic acid involvement in craniofacial and limb malformations. Histochemical and scanning electron microscopical observations (Emmanouil-Nikoloussi, *et al.*) **182,** 130, *P*
Liver, Evidence for existence of intrahepatic portosystemic shunts in the normal rat liver (Jaffe, *et al.*) **182,** 125, *P*
The proliferative status of cells derived from murine fetal liver which form colonies in vitro (high proliferative potential colony-forming cells – HPP.CFC) (Blair, *et al.*) **182,** 129, *P*
A quantitative assessment of lobar liver pathology in the rat following treatment with coumarin (Fernyhough, *et al.*) **182,** 138, *dem*
Lung, Anatomy of Clara cell secretion: surface changes observed by scanning electron microscopy (Peão, *et al.*) **182,** 377

Macrophages, Changes in quantitative cytochemistry during human macrophage development (Sokol, *et al.*) **182,** 136, *dem*
Malassez epithelial rests, Periodontal neural endings intimately relate to epithelial rests of Malassez in humans. A light and electron microscope study (Lambrichts, *et al.*) **182,** 153
Malformations, Retinoic acid involvement in craniofacial and limb malformations. Histochemical and scanning electron microscopical observations (Emmanouil-Nikoloussi, *et al.*) **182,** 130, *P*
Malignancy, A scanning electron microscopic study of normal and malignant exfoliated oral squames (Murray, *et al.*) **182,** 136, *dem*
Mandibular nerve, Distribution of otic postganglionic and recurrent mandibular nerve fibres to the cavernous sinus plexus in monkeys (Ruskell) **182,** 187
Marmoset, Innervation of the marmoset adrenal gland: a retrograde fluorescent tracer study (Kesse & Parker) **182,** 139, *dem*
Marsupials, Gonadal sex differentiation in embryos and neonates of the marsupial, *Monodelphis domestica*: arrest of testis development in postterm embryos (Baker, *et al.*) **182,** 267
Mast cells, Responses of dermal mast cells to injury (El Sayed So & Dyson) **182,** 369
Maxillary nerve, Distribution of otic postganglionic and recurrent mandibular nerve fibres to the cavernous sinus plexus in monkeys (Ruskell) **182,** 187
Mechanical stress, Early periosteal changes in translation-induced bone modelling (Feik) **182,** 389
Memory, Evidence for a lateralisation of changes in synaptic size following memory formation (Hunter) **182,** 142, *dem*
Metamorphosis, A study of the innervation of the spleen of *Xenopus laevis*, the South African clawed toad, during metamorphosis (Clothier, *et al.*) **182,** 143, *dem*
Metrial gland, Antibodies to rat metrial gland (Mikhailov, *et al.*) **182,** 150, *dem*
Microangiopathy, Regional study of microangiography in human diabetic neuropathy, suggesting two possible mechanisms of pathogenesis (Thompson, *et al.*) **182,** 128, *P*
Microappendages, Microappendages on the atrioventricular valves of the guinea pig (Hill & Folan-Curran) **182,** 425
Microglia, A quantitative study of the differentiation of microglial cells in the developing cerebral cortex in rats (Wu, *et al.*) **182,** 403
Variation with age in the labelling of amoeboid microglial cells in rats following intraperitoneal or intravenous injection of a fluorescent dye (Xu, *et al.*) **182,** 55
Microparticle uptake, The uptake of microparticles across the intestinal epithelium in the rabbit and rat (Howard, *et al.*) **182,** 138, *dem*
Microtus agrestis, The ultrastructure of giant interstitial trophoblast cells in the decidua of the pregnant short-tailed field vole (*Microtus agrestis*) (Stewart & Clarke) **182,** 150, *dem*
Microvilli, Effects of insulin and aldose reductase inhibition on enterocyte microvilli in streptozotocin-diabetic small intestine (Williams & Mayhew) **182,** 132, *P*
Mitral valve, The atrioventricular valves of the mouse. I. A scanning electron microscope study (Icardo, *et al.*) **182,** 87
Monkey, Patterns of craniofacial growth in the sooty mangabey, *Cercocebus atys* (O'Higgins) **182,** 127, *P*
Innervation of the marmoset adrenal gland: a retrograde fluorescent tracer study (Kesse & Parker) **182,** 139, *dem*
Distribution of otic postganglionic and recurrent mandibular nerve fibres to the cavernous sinus plexus in monkeys (Ruskell) **182,** 187
Ultrastructure of the monkey thoracic duct and the cisterna chyli (Lee, *et al.*) **182,** 205

Monodelphis domestica, Gonadal sex differentiation in embryos and neonates of the marsupial, *Monodelphis domestica*: arrest of testis development in postterm embryos (Baker, *et al.*) **182,** 267
Novel articular cartilage structure in the South American opossum, *Monodelphis domestica* (Morrison, *et al.*) **182,** 321
Mononuclear cells, Subplasmalemmal linear densities in mononuclear cells induced by an antigen in human sensory peripheral nerve (Crawford & Hardwicke) **182,** 129, *P*
Morphometry, An ultrastructural morphometric study of epithelial nuclei at defined levels of normal colorectal crypts (Tipoe, *et al.*) **182,** 137, *dem*
Quantitative and spatial aspects of degenerative changes in rat soleus muscle after exercise of different durations (Van der Meulen, *et al.*) **182,** 349
Mouse, The inheritance of patterns of variation in the mouse vertebral column (Johnson & O'Higgins) **182,** 126, *P*
The proliferative status of cells derived from murine fetal liver which form colonies in vitro (high proliferative potential colony-forming cells – HPP.CFC) (Blair, *et al.*) **182,** 129, *P*
Variation in epithelium and muscle in the jejunum of two strains of mice (Brennan, *et al.*) **182,** 137, *dem*
A morphometric study of mucigen granules in control and irradiated mouse colon (Nunn, *et al.*) **182,** 137, *dem*
GABA as a regulator of neurite growth in mouse spinal cord structures (Owen & Bird) **182,** 140, *dem*
Scanning electron microscopy of the cellular associations formed between mouse granulated metrial gland cells and labyrinthine placental trophoblast in culture (Stewart & Mukhtar) **182,** 150, *dem*
Observations of the surface morphology of cultured granulated metrial gland cells (Mukhtar & Stewart) **182,** 415
The inheritance of vertebral shape in the mouse II. A study using Fourier analysis to examine the inheritance of patterns of vertebral variation in the cervical and upper thoracic vertebral column (O'Higgins & Johnson) **182,** 65
The atrioventricular valves of the mouse. I. A scanning electron microscope study (Icardo, *et al.*) **182,** 87
Mouth, A scanning electron microscopic study of normal and malignant exfoliated oral squames (Murray, *et al.*) **182,** 136, *dem*
MR imaging, Morphometry of human thigh muscles. Determination of fascicle architecture by magnetic resonance imaging (Scott, *et al.*) **182,** 249
Mucigen granules, A morphometric study of mucigen granules in control and irradiated mouse colon (Nunn, *et al.*) **182,** 137, *dem*
Muscle, The response of the rabbit tibialis anterior muscle to distraction of the tibia (Williams, *et al.*) **182,** 126, *P*
Late myoblasts are capable of fusing with both primary and secondary muscle fibres (Evans, *et al.*) **182,** 127, *P*
Variation in epithelium and muscle in the jejunum of two strains of mice (Brennan, *et al.*) **182,** 137, *dem*
A morphological examination of the smooth muscle and collagen network of varicose veins (Dovell, *et al.*) **182,** 145, *dem*
Morphological and histochemical characteristics of muscle fibre types in the flexor carpi radialis of the dog (Latorre, *et al.*) **182,** 313
Skeletal muscle fibre types in the dog (Latorre, *et al.*) **182,** 329
Muscle damage, Quantitative and spatial aspects of degenerative changes in rat soleus muscle after exercise of different durations (Van der Meulen, *et al.*) **182,** 349
Muscle fibre composition, The effect of nutrition on the size and proportion of muscle fibres during growth (Yamaguchi, *et al.*) **182,** 29
Muscle histochemistry, A study of smooth muscle activity in varicose and nonvaricose veins using the succinate dehydrogenase method (Southall, *et al.*) **182,** 125, *P*
Muscle morphometry, Morphometry of human thigh muscles. Determination of fascicle architecture by magnetic resonance imaging (Scott, *et al.*) **182,** 249
Muscles, A rare anomaly of abductor digiti minimi (Sañudo, *et al.*) **182,** 439
Myoblast fusion, Late myoblasts are capable of fusing with both primary and secondary muscle fibres (Evans, *et al.*) **182,** 127, *P*

Nerve regeneration, Regeneration of a transected rat peripheral nerve through a connective tissue tube. A preliminary report (Ghabriel, *et al.*) **182,** 128, *P*
Neural crest, The effects of extremely low frequency electromagnetic fields on migrating mammalian and avian neural crest cells (Parker, *et al.*) **182,** 140, *dem*
Neural endings, Periodontal neural endings intimately relate to epithelial rests of Malassez in humans. A light and electron microscope study (Lambrichts, *et al.*) **182,** 153
Neural tube, Reopening of the neural tube by administration of retinoic acid to postimplantation rat conceptuses by intravitelline injection – a possible mechanism for neural tube defects (Cumberland & Pratten) **182,** 148, *dem*
Neurite growth, GABA as a regulator of neurite growth in mouse spinal cord structures (Owen & Bird) **182,** 140, *dem*
Neuroleptics, Predicting the cellular targets of neuroleptics from a knowledge of their physicochemical properties. A numerical structure-activity relationship approach (Inuwa, *et al.*) **182,** 139, *dem*
Neuronal cell culture, Immunocytochemical localisation of insulin receptors on rat superior cervical ganglion neurons in dissociated cell culture (James, *et al.*) **182,** 95
A combined in vitro labelling technique for cultured suprachiasmatic neurons (SCN) prior to transplantation (Meal, *et al.*) **182,** 140, *dem*
Neuropathy, Experimental galactose neuropathy: quantitative changes in intramembranous particles in fracture faces of the perineurium (Beamish, *et al.*) **182,** 105
Regional study of microangiography in human diabetic neuropathy, suggesting two possible mechanisms of pathogenesis (Thompson, *et al.*) **182,** 128, *P*
Unmyelinated fibre morphology in patients with mild diabetic neuropathy (Townsend, *et al.*) **182,** 128, *P*
Do neurophysiological and pathological abnormalities of unmyelinated fibres discriminate painful from painless diabetic neuropathy (Townsend, *et al.*) **182,** 142, *dem*
Neuropeptide Y, An immunohistochemical study for neuropeptide Y and vasoactive intestinal polypeptide in ovine, bovine and equine adrenal medulla (Lammens, *et al.*) **182,** 141, *dem*
Noradrenaline, Morphological aspects of chromaffin tissue: the differential fixation of adrenaline and noradrenaline (Kobayashi & Coupland) **182,** 121, *P*
Chromium binding studies on rat adrenal medullary noradrenaline-containing granules following glutaraldehyde fixation (Santer & Hann) **182,** 124, *P*
Noradrenaline content in primary varicose veins (Baker, *et al.*) **182,** 125, *P*
Nucleolar organising regions, Cellular activity in the developing palate of the rat assessed by the staining of nucleolar organising regions (Singh & Moxham) **182,** 163
5′-Nucleotidase, Apical–basal membrane polarity of membrane phosphatases in isolated capillary endothelium: alteration in ultrastructural localisation under culture conditions (Roberts & Sandra) **182,** 339
Nutrition, Diet-induced histological changes in the epididymis of rats (Umapathy & Msamati) **182,** 130, *P*
The effect of nutrition on the size and proportion of muscle fibres during growth (Yamaguchi, *et al.*) **182,** 29

Occipital squama, Developmental studies on the interparietal part of the human occipital squama (Matsumura, *et al.*) **182,** 197
Olfactory neurons, Clonal cell cultures from human fetal olfactory neurons (Balboni, *et al.*) **182,** 131, *P*
Oocytes, An analysis of the interaction between human spermatozoa and oocyte-cumulus complexes in in vitro studies (Lister, *et al.*) **182,** 149, *dem*
Opossum, Novel articular cartilage structure in the South American opossum, *Monodelphis domestica* (Morrison, *et al.*) **182,** 321
Oral mucosa, A study of the vascular arrangements and histology of the canine oral mucosa of the hard palate (Wang & Lung) **182,** 146, *dem*

Oronasal epithelium, Morphometric differences between basal cell nuclei in the developing oronasal epithelium prior to palatal fusion. I. Nuclear size (Chan & White) **182,** 151, *dem*
Morphometric differences between basal cell nuclei in the developing oronasal epithelium prior to palatal fusion. II. Nuclear frequency (Chan, *et al.*) **182,** 152, *dem*
Osteichthyes, A survey of chondroid bone in Osteichthyes (Benjamin & Huysseune) **182,** 134, *dem*
Otic ganglion, Distribution of otic postganglionic and recurrent mandibular nerve fibres to the cavernous sinus plexus in monkeys (Ruskell) **182,** 187
Ovarian artery, Unique course of the ovarian artery associated with other variations (Rahman, *et al.*) **182,** 287

Pacinian corpuscles, Distribution of pacinian corpuscles in the cat forefoot (Kumamato, *et al.*) **182,** 23
Pain, Do neurophysiological and pathological abnormalities of unmyelinated fibres discriminate painful from painless diabetic neuropathy (Townsend, *et al.*) **182,** 142, *dem*
Palate, A study of the vascular arrangements and histology of the canine oral mucosa of the hard palate (Wang & Lung) **182,** 146, *dem*
Morphometric differences between basal cell nuclei in the developing oronasal epithelium prior to palatal fusion. I. Nuclear size (Chan & White) **182,** 151, *dem*
Morphometric differences between basal cell nuclei in the developing oronasal epithelium prior to palatal fusion. II. Nuclear frequency (Chan, *et al.*) **182,** 152, *dem*
Cellular activity in the developing palate of the rat assessed by the staining of nucleolar organising regions (Singh & Moxham) **182,** 163
Pancreas, Ultrastructure of transplanted pancreatic islets in the rat (Tahir, *et al.*) **182,** 124, *P*
Transplantation of pancreatic islets into the tongue of diabetic rats (El-Naggar, *et al.*) **182,** 124, *P*
Pancreatic islets, Morphological observations on pancreatic islet blood vessels in low-dose streptozocin-treated mice (Papaccio, *et al.*) **182,** 45
Paper models, Paper models to illustrate regional anatomy (Stephenson & Castle) **182,** 139, *dem*
Parasympathetic nerves, Distribution of otic postganglionic and recurrent mandibular nerve fibres to the cavernous sinus plexus in monkeys (Ruskell) **182,** 187
Partial thickness wound, Responses of dermal mast cells to injury (El Sayed So & Dyson) **182,** 369
Perineurium, Experimental galactose neuropathy: quantitative changes in intramembranous particles in fracture faces of the perineurium (Beamish, *et al.*) **182,** 105
Periodontal ligament, Periodontal neural endings intimately relate to epithelial rests of Malassez in humans. A light and electron microscope study (Lambrichts, *et al.*) **182,** 153
Periosteum, Early periosteal changes in translation-induced bone modelling (Feik) **182,** 389
Peripheral nerve, Regeneration of a transected rat peripheral nerve through a connective tissue tube. A preliminary report (Ghabriel, *et al.*) **182,** 128, *P*
Unmyelinated fibre morphology in patients with mild diabetic neuropathy (Townsend, *et al.*) **182,** 128, *P*
Subplasmalemmal linear densities in mononuclear cells induced by an antigen in human sensory peripheral nerve (Crawford & Hardwicke) **182,** 129, *P*
The course of the distal superficial peroneal nerve and its relationship to injury during surgical procedures (Herron, *et al.*) **182,** 141, *dem*
Pig, Substance P and vasoactive intestinal polypeptide in the adrenal gland of the fetal pig: an immunohistochemical approach (Weyns, *et al.*) **182,** 141, *dem*
Placenta, Growth of human placental trophoblast after the first trimester: stereological evidence of hyperplasia without hypertrophy (Simpson & Mayhew) **182,** 131, *P*
The inter-relationship between the fetal human and maternal placental circulations – a new stereological approach (Karimu & Burton) **182,** 131, *P*
The effects of insulin and insulin-like growth factor II on embryogenesis and ectoplacental growth (Travers, *et al.*) **182,** 146, *dem*
Scanning electron microscopy of the cellular associations formed between mouse granulated metrial gland cells and labyrinthine placental trophoblast in culture (Stewart & Mukhtar) **182,** 150, *dem*
Population variation, High incidence of the third head of biceps brachii in South African populations (Asvat, *et al.*) **182,** 101
Portosystemic shunts, Evidence for existence of intrahepatic portosystemic shunts in the normal rat liver (Jaffe, *et al.*) **182,** 125, *P*
Pregnancy, Growth of human placental trophoblast after the first trimester: stereological evidence of hyperplasia without hypertrophy (Simpson & Mayhew) **182,** 131, *P*
Scanning electron microscopy of the cellular associations formed between mouse granulated metrial gland cells and labyrinthine placental trophoblast in culture (Stewart & Mukhtar) **182,** 150, *dem*
The ultrastructure of giant interstitial trophoblast cells in the decidua of the pregnant short-tailed field vole (*Microtus agrestis*) (Stewart & Clarke) **182,** 150, *dem*
Observations of the surface morphology of cultured granulated metrial gland cells (Mukhtar & Stewart) **182,** 415
Uterine morphology and the distribution of granulated metrial gland cells in the virgin and pregnant short-tailed field vole, *Microtus agrestis* (Stewart & Clarke) **182,** 75
Preinterparietal bone, Developmental studies on the interparietal part of the human occipital squama (Matsumura, *et al.*) **182,** 197
Primordial germ cells, Chick primordial germ cells normally populate the stages 6–8 headfold region (England) **182,** 149, *dem*
Proximal tubule, The mammalian glomerotubular junction studied by scanning and transmission electron microscopy (Lee, *et al.*) **182,** 177
Purkinje cells, New structural aspects of the synaptic contacts on Purkinje cells in an elasmobranch cerebellum (Alvarez-Otero, *et al.*) **182,** 13

Rabbit, The response of the rabbit tibialis anterior muscle to distraction of the tibia (Williams, *et al.*) **182,** 126, *P*
The uptake of microparticles across the intestinal epithelium in the rabbit and rat (Howard, *et al.*) **182,** 138, *dem*
Radiography, Developments in techniques for the study of cancellous bone architecture from radiographic images (O'Higgins & Ellison) **182,** 135, *dem*
Rat, Transplantation of pancreatic islets into the tongue of diabetic rats (El-Naggar, *et al.*) **182,** 124, *P*
Chromium binding studies on rat adrenal medullary noradrenaline-containing granules following glutaraldehyde fixation (Santer & Hann) **182,** 124, *P*
Ultrastructure of transplanted pancreatic islets in the rat (Tahir, *et al.*) **182,** 124, *P*
Evidence for existence of intrahepatic portosystemic shunts in the normal rat liver (Jaffe, *et al.*) **182,** 125, *P*
Regeneration of a transected rat peripheral nerve through a connective tissue tube. A preliminary report (Ghabriel, *et al.*) **182,** 128, *P*
Diet-induced histological changes in the epididymis of rats (Umapathy & Msamati) **182,** 130, *P*
Studies on the development of the rat knee joint (Dowthwaite, *et al.*) **182,** 133, *dem*
Age-related changes in fibrocartilages associated with the Achilles tendon of the rat (Rufai, *et al.*) **182,** 134, *dem*
A quantitative assessment of lobar liver pathology in the rat following treatment with coumarin (Fernyhough, *et al.*) **182,** 138, *dem*
The uptake of microparticles across the intestinal epithelium in the rabbit and rat (Howard, *et al.*) **182,** 138, *dem*
Cell loss during early postnatal development of the rat inferior olivary nucleus (Piyawinijiwong, *et al.*) **182,** 139, *dem*
Calcitonin gene-related peptide innervation of rat stomach: an ultrastructural study (Ali & Vaillant) **182,** 143, *dem*
Use of confocal and epifluorescence microscopy to analyse the distribution of insulin and insulin-like growth factor 1 receptors on the rat visceral yolk sac (Cowley & Pratten) **182,** 147, *dem*
A comparative study of the uptake of fluorescently labelled

immunoglobulin G (IgG) and bovine serum albumin in cultured rat visceral yolk sacs (Jefferson & Pratten) **182,** 147, *dem*
The ontogeny of cytochrome P450 IV gene expression in the rat (Simpson, *et al.*) **182,** 148, *dem*
Reopening of the neural tube by administration of retinoic acid to postimplantation rat conceptuses by intravitelline injection – a possible mechanism for neural tube defects (Cumberland & Pratten) **182,** 148, *dem*
Antibodies to rat metrial gland (Mikhailov, *et al.*) **182,** 150, *dem*
Does the sperm granuloma of the rat show progressive structural changes which might influence the immune response to vasectomy? (McCracken & McDonald) **182,** 151, *dem*
Cellular activity in the developing palate of the rat assessed by the staining of nucleolar organising regions (Singh & Moxham) **182,** 163
Bone blood flow in the rat using arteriolar blockade: comparisons between labelled resin particles and microspheres (Revell & Brookes) **182,** 305
Apical–basal membrane polarity of membrane phosphatases in isolated capillary endothelium: alteration in ultrastructural localisation under culture conditions (Roberts & Sandra) **182,** 339
Quantitative and spatial aspects of degenerative changes in rat soleus muscle after exercise of different durations (Van der Meulen, *et al.*) **182,** 349
Responses of dermal mast cells to injury (El Sayed So & Dyson) **182,** 369
Variation with age in the labelling of amoeboid microglial cells in rats following intraperitoneal or intravenous injection of a fluorescent dye (Xu, *et al.*) **182,** 55
Immunocytochemical localisation of insulin receptors on rat superior cervical ganglion neurons in dissociated cell culture (James, *et al.*) **182,** 95

Receptors, Use of confocal and epifluorescence microscopy to analyse the distribution of insulin and insulin-like growth factor 1 receptors on the rat visceral yolk sac (Cowley & Pratten) **182,** 147, *dem*
Immunocytochemical localisation of insulin receptors on rat superior cervical ganglion neurons in dissociated cell culture (James, *et al.*) **182,** 95

Regional anatomy, Paper models to illustrate regional anatomy (Stephenson & Castle) **182,** 139, *dem*

Retinoic acid, Retinoic acid involvement in craniofacial and limb malformations. Histochemical and scanning electron microscopical observations (Emmanouil-Nikoloussi, *et al.*) **182,** 130, *P*
Reopening of the neural tube by administration of retinoic acid to postimplantation rat conceptuses by intravitelline injection – a possible mechanism for neural tube defects (Cumberland & Pratten) **182,** 148, *dem*

Rhodamine labelling, Variation with age in the labelling of amoeboid microglial cells in rats following intraperitoneal or intravenous injection of a fluorescent dye (Xu, *et al.*) **182,** 55

Scoliosis, Functional morphology and the development of adolescent idiopathic scoliosis (Burwell, *et al.*) **182,** 126, *P*

Scyliorhinus canicula, New structural aspects of the synaptic contacts on Purkinje cells in an elasmobranch cerebellum (Alvarez-Otero, *et al.*) **182,** 13

Secondary hair follicles, Growth and viability of secondary hair follicles of the Angora goat cultured in vitro (Ibraheem, *et al.*) **182,** 231

Sheep, An immunohistochemical study for neuropeptide Y and vasoactive intestinal polypeptide in ovine, bovine and equine adrenal medulla (Lammens, *et al.*) **182,** 141, *dem*

Skeletal muscle, The response of the rabbit tibialis anterior muscle to distraction of the tibia (Williams, *et al.*) **182,** 126, *P*
Anatomy and development of an 'iliolumbar' part of the erector spinae muscle (Evans, *et al.*) **182,** 135, *dem*

Skin, Development of a human epidermal equivalent in vitro (Ward, *et al.*) **182,** 151, *dem*
Vasomotor innervation of the skin of the hand: a contribution to the study of human anatomy (Campero, *et al.*) **182,** 361

Skull, The coronal suture system (Hoyte) **182,** 128, *P*
Developmental studies on the interparietal part of the human occipital squama (Matsumura, *et al.*) **182,** 197

Smooth muscle, A study of smooth muscle activity in varicose and nonvaricose veins using the succinate dehydrogenase method (Southall, *et al.*) **182,** 125, *P*
Variation in epithelium and muscle in the jejunum of two strains of mice (Brennan, *et al.*) **182,** 137, *dem*
A morphological examination of the smooth muscle and collagen network of varicose veins (Dovell, *et al.*) **182,** 145, *dem*

Sodium absorption, Morphometry of hen lower intestine at different rates of sodium-absorption: plasma membrane signatures of cells and whole organs (Dantzer, *et al.*) **182,** 132, *P*

Soleus, Quantitative and spatial aspects of degenerative changes in rat soleus muscle after exercise of different durations (Van der Meulen, *et al.*) **182,** 349

South American opossum, Novel articular cartilage structure in the South American opossum, *Monodelphis domestica* (Morrison, *et al.*) **182,** 321

Sperm granuloma, Does the sperm granuloma of the rat show progressive structural changes which might influence the immune response to vasectomy? (McCracken & McDonald) **182,** 151, *dem*

Spermatozoa, An analysis of the interaction between human spermatozoa and oocyte-cumulus complexes in in vitro studies (Lister, *et al.*) **182,** 149, *dem*

Spinal cord, GABA as a regulator of neurite growth in mouse spinal cord structures (Owen & Bird) **182,** 140, *dem*
Descending projections to coccygeal spinal segments in the cat (Wada, *et al.*) **182,** 259

Spleen, A study of the innervation of the spleen of *Xenopus laevis*, the South African clawed toad, during metamorphosis (Clothier, *et al.*) **182,** 143, *dem*

Stereology, The inter-relationship between the fetal human and maternal placental circulations – a new stereological approach (Karimu & Burton) **182,** 131, *P*
The inter-relationship between the fetal human and maternal placental circulations – a new stereological approach (Karimu & Burton) **182,** 131, *P*
Growth of human placental trophoblast after the first trimester: stereological evidence of hyperplasia without hypertrophy (Simpson & Mayhew) **182,** 131, *P*

Stomach, Calcitonin gene-related peptide innervation of rat stomach: an ultrastructural study (Ali & Vaillant) **182,** 143, *dem*

Streptozocin, Morphological observations on pancreatic islet blood vessels in low-dose streptozocin-treated mice (Papaccio, *et al.*) **182,** 45

Streptozotocin, Effects of insulin and aldose reductase inhibition on enterocyte microvilli in streptozotocin-diabetic small intestine (Williams & Mayhew) **182,** 132, *P*

Stretching, The response of the rabbit tibialis anterior muscle to distraction of the tibia (Williams, *et al.*) **182,** 126, *P*

Submandibular gland, A study on the vascular organisation and histology of the submandibular gland of the dog (Lung) **182,** 146, *dem*

Substance P, Substance P and vasoactive intestinal polypeptide in the adrenal gland of the fetal pig: an immunohistochemical approach (Weyns, *et al.*) **182,** 141, *dem*

Succinic dehydrogenase, A study of smooth muscle activity in varicose and nonvaricose veins using the succinate dehydrogenase method (Southall, *et al.*) **182,** 125, *P*

Superficial peroneal nerve, The course of the distal superficial peroneal nerve and its relationship to injury during surgical procedures (Herron, *et al.*) **182,** 141, *dem*

Superior cervical ganglion, Innervation of the rat tympanic membrane from the superior cervical and glossopharyngeal ganglia (Tierney, *et al.*) **182,** 355
Immunocytochemical localisation of insulin receptors on rat superior cervical ganglion neurons in dissociated cell culture (James, *et al.*) **182,** 95

Supernumerary cusp, Morphology of the most common form of protostylid on human lower molars (Gašperšič) **182,** 429
Suprachiasmatic nucleus, A combined in vitro labelling technique for cultured suprachiasmatic neurons (SCN) prior to transplantation (Meal, *et al.*) **182,** 140, *dem*
Surgery, The course of the distal superficial peroneal nerve and its relationship to injury during surgical procedures (Herron, *et al.*) **182,** 141, *dem*
Synaptic size, Evidence for a lateralisation of changes in synaptic size following memory formation (Hunter) **182,** 142, *dem*
Synaptogenesis, Time-course of synaptogenesis following passive avoidance learning in the chick (Hunter) **182,** 142, *dem*

Tail, Descending projections to coccygeal spinal segments in the cat (Wada, *et al.*) **182,** 259
Teaching, First steps in producing computer packages for medical students (Thomas, *et al.*) **182,** 138, *dem*
Paper models to illustrate regional anatomy (Stephenson & Castle) **182,** 139, *dem*
Teleosts, Bruch's membrane with an elastic lamina in the eye of a teleost (Nag) **182,** 113
Tendon, Cell and matrix changes associated with pathological calcification of the human rotator cuff tendons (Archer, *et al.*) **182,** 1
Age-related changes in fibrocartilages associated with the Achilles tendon of the rat (Rufai, *et al.*) **182,** 134, *dem*
Fibrocartilage in the volar plate and extensor tendon of the proximal interphalangeal joint of human fingers (Ralphs, *et al.*) **182,** 134, *dem*
Tendon rupture, Loss of the fibrocartilaginous lining of the intertubercular sulcus associated with rupture of the tendon of the long head of biceps brachii (Benjamin, *et al.*) **182,** 281
Tensor fasciae latae, Innervation of the anteromedial muscle bundles of the gluteus medius (Akita, *et al.*) **182,** 433
Testis, Gonadal sex differentiation in embryos and neonates of the marsupial, *Monodelphis domestica*: arrest of testis development in postterm embryos (Baker, *et al.*) **182,** 267
Thermography, Vasomotor innervation of the skin of the hand: a contribution to the study of human anatomy (Campero, *et al.*) **182,** 361
Thoracic duct, Ultrastructure of the monkey thoracic duct and the cisterna chyli (Lee, *et al.*) **182,** 205
Thrombocytes, Autoradiographic analysis of the uptake of [^{3}H]dopamine, [^{3}H]angiotensin II and [^{3}H]gamma aminobutyric acid by the chicken thrombocyte (Daimon, *et al.*) **182,** 169
Toad, A study of the innervation of the spleen of *Xenopus laevis*, the South African clawed toad, during metamorphosis (Clothier, *et al.*) **182,** 143, *dem*
Tonsil, The tonsillar corpuscle (Perry & Slipka) **182,** 130, *P*
Tonsillar corpuscle, The tonsillar corpuscle (Perry & Slipka) **182,** 130, *P*
Transmitter receptors, Differences in architecture and transmitter receptor distribution between motor and sensory areas of the human neocortex (Zilles) **182,** 129, *P*
Transplantation, Transplantation of pancreatic islets into the tongue of diabetic rats (El-Naggar, *et al.*) **182,** 124, *P*
Ultrastructure of transplanted pancreatic islets in the rat (Tahir, *et al.*) **182,** 124, *P*
A combined in vitro labelling technique for cultured suprachiasmatic neurons (SCN) prior to transplantation (Meal, *et al.*) **182,** 140, *dem*
Transverse metacarpal ligament, An anatomical study of the deep transverse metacarpal ligament (Al-Qattan & Robertson) **182,** 443
Tricuspid valve, The atrioventricular valves of the mouse. I. A scanning electron microscope study (Icardo, *et al.*) **182,** 87
Trophoblast, Growth of human placental trophoblast after the first trimester: stereological evidence of hyperplasia without hypertrophy (Simpson & Mayhew) **182,** 131, *P*
The ultrastructure of giant interstitial trophoblast cells in the decidua of the pregnant short-tailed field vole (*Microtus agrestis*) (Stewart & Clarke) **182,** 150, *dem*
Scanning electron microscopy of the cellular associations formed between mouse granulated metrial gland cells and labyrinthine placental trophoblast in culture (Stewart & Mukhtar) **182,** 150, *dem*
True Blue, Innervation of the rat tympanic membrane from the superior cervical and glossopharyngeal ganglia (Tierney, *et al.*) **182,** 355
Tympanic membrane, Innervation of the rat tympanic membrane from the superior cervical and glossopharyngeal ganglia (Tierney, *et al.*) **182,** 355

Ubiquitin, Ubiquitin-protein conjugates, αB crystallin and ubiquitin C-terminal hydrolase (PGP9.5) in the developing lens (Royal, *et al.*) **182,** 147, *dem*
Ultrastructure, Ultrastructure of the monkey thoracic duct and the cisterna chyli (Lee, *et al.*) **182,** 205
Unmyelinated axons, Unmyelinated fibre morphology in patients with mild diabetic neuropathy (Townsend, *et al.*) **182,** 128, *P*
Do neurophysiological and pathological abnormalities of unmyelinated fibres discriminate painful from painless diabetic neuropathy (Townsend, *et al.*) **182,** 142, *dem*
Uterus, Polarised growth of human endometrial epithelial cells in vitro (Hill, *et al.*) **182,** 149, *dem*
Observations of the surface morphology of cultured granulated metrial gland cells (Mukhtar & Stewart) **182,** 415
Uterine morphology and the distribution of granulated metrial gland cells in the virgin and pregnant short-tailed field vole, *Microtus agrestis* (Stewart & Clarke) **182,** 75

Varicose veins, Noradrenaline content in primary varicose veins (Baker, *et al.*) **182,** 125, *P*
A study of smooth muscle activity in varicose and nonvaricose veins using the succinate dehydrogenase method (Southall, *et al.*) **182,** 125, *P*
A morphological examination of the smooth muscle and collagen network of varicose veins (Dovell, *et al.*) **182,** 145, *dem*
Morphological evaluation of collagen in varicose and nonvaricose veins using computerised image analysis (Travers, *et al.*) **182,** 145, *dem*
Vasectomy, Does the sperm granuloma of the rat show progressive structural changes which might influence the immune response to vasectomy? (McCracken & McDonald) **182,** 151, *dem*
Vasoactive intestinal peptide, Substance P and vasoactive intestinal polypeptide in the adrenal gland of the fetal pig: an immunohistochemical approach (Weyns, *et al.*) **182,** 141, *dem*
An immunohistochemical study for neuropeptide Y and vasoactive intestinal polypeptide in ovine, bovine and equine adrenal medulla (Lammens, *et al.*) **182,** 141, *dem*
Vasomotor innervation, Vasomotor innervation of the skin of the hand: a contribution to the study of human anatomy (Campero, *et al.*) **182,** 361
Veins, Noradrenaline content in primary varicose veins (Baker, *et al.*) **182,** 125, *P*
A study of smooth muscle activity in varicose and nonvaricose veins using the succinate dehydrogenase method (Southall, *et al.*) **182,** 125, *P*
A morphological examination of the smooth muscle and collagen network of varicose veins (Dovell, *et al.*) **182,** 145, *dem*
Morphological evaluation of collagen in varicose and nonvaricose veins using computerised image analysis (Travers, *et al.*) **182,** 145, *dem*
Vertebral column, Functional morphology and the development of adolescent idiopathic scoliosis (Burwell, *et al.*) **182,** 126, *P*
The inheritance of patterns of variation in the mouse vertebral column (Johnson & O'Higgins) **182,** 126, *P*
Vertebral shape, The inheritance of vertebral shape in the mouse II. A study using Fourier analysis to examine the inheritance of patterns of vertebral variation in the cervical and upper thoracic vertebral column (O'Higgins & Johnson) **182,** 65
Vole, The ultrastructure of giant interstitial trophoblast cells in the decidua of the pregnant short-tailed field vole (*Microtus agrestis*) (Stewart & Clarke) **182,** 150, *dem*

Xenopus laevis, A study of the innervation of the spleen of *Xenopus laevis*, the South African clawed toad, during metamorphosis (Clothier, *et al.*) **182,** 143, *dem*

X-irradiation, A morphometric study of mucigen granules in control and irradiated mouse colon (Nunn, *et al.*) **182,** 137, *dem*

Yolk sac, Use of confocal and epifluorescence microscopy to analyse the distribution of insulin and insulin-like growth factor 1 receptors on the rat visceral yolk sac (Cowley & Pratten) **182,** 147, *dem*

A comparative study of the uptake of fluorescently labelled immunoglobulin G (IgG) and bovine serum albumin in cultured rat visceral yolk sacs (Jefferson & Pratten) **182,** 147, *dem*
